

## how to use it **Jalosome®**

### **Jalosome® Soothing gel**

- wash your hands thoroughly
- take a sufficient quantity of product, considering that each supply corresponds to 0.2 grams and it is sufficient to treat 16 cm<sup>2</sup> of skin
- apply the needed quantity depending on the skin lesion size
- gently massage in order to spread the product evenly
- repeat the treatment twice a day, until the problem is solved or unless otherwise prescribed by a doctor.

### **Jalosome® Hydrating cream**

- wash your hands thoroughly
- take a sufficient quantity of product
- apply on the affected areas with a gentle and circular movement
- distribute until completely absorbed
- repeat the treatment several times a day, as needed.

If you use Jalosome® Hydrating cream for the hydration of the whole body, start the application from the bottom upwards, so as to stimulate blood circulation

# Jalosome®

## Take care of your skin during the care

**The complete solution designed  
for patients undergoing  
radiotherapy and chemotherapy**

**WELCARE**  
Protecting People - Caring for Nature

# To PREVENT and TREAT SKIN LESIONS FROM RADIOTHERAPY

**Jalosome® Soothing gel is indicated in the preventive phase:**

- ▶ To prepare the skin for radiotherapy treatment
- ▶ Counter the effects of radiation therapy
- ▶ Delay the appearance and the intensity of skin lesions

**During therapy,** Jalosome® Soothing gel has been specifically studied to:

- ▶ Treat skin subjected to radiation therapy
- ▶ Stimulate tissue repair during therapy
- ▶ Support the cell regeneration process
- ▶ Reduce the intensity of local pain.

It contains only useful components to protect skin from radiotherapy skin lesions, reduce damage and side effects, including localized pain, contribute to tissue repair.

It has no contraindications, it can be used during radiotherapy treatment, **it does not interfere with other therapies.**

**Jalosome® Soothing gel**

## FUNCTIONAL INGREDIENTS

- N-Acetylcarnitine
- Hyaluronic acid with high and low molecular weight
- Allantoin

▶ **DOES NOT CONTAIN:** oils, parabens, PEG, silicones, perfume, SLS (Sodium Lauryl Sulphate).

**Jalosome® Soothing gel**  
Airless bottle to minimize the risk of contamination

# To CONTINUE SKIN CARE AFTER RADIOTHERAPY

**Jalosome® Hydrating cream is indicated: to continue supporting tissue repair processes, reducing redness and burning at the end of the radiotherapy cycle.**

Jalosome® Hydrating cream has been designed to continue the skin care treatment at the end of the radiotherapy cycle.

Its natural components are indicated to:

- ▶ Restore the hydrophilic power of the skin
- ▶ Eliminate redness
- ▶ Reduce any injuries that may still be present

**It has no contraindications and does not interfere with other therapies.** Due to its oily components, **do not use during radiotherapy treatment.**

**Jalosome® Hydrating cream**

## FUNCTIONAL INGREDIENTS

- Aloe Barbadensis leaf extract
- Olea Europaea fruit extract
- Triticum Vulgare germ oil
- Prunus Amygdalus oil

▶ **DOES NOT CONTAIN:** parabens, PEG, SLS silicones (Sodium Lauryl Sulphate).
