

Hydrating Cream Jalosome

Class IIa medical device in cream form, recommended at the conclusion of radiotherapy and chemotherapy treatments. It is indicated for the restoration and maintenance of the integrity of fragile skin previously exposed to treatments, creating favorable conditions for tissue regeneration.

At the end of radiotherapy treatment, the skin may become irritated and dehydrated, requiring proper care.

Jalosome® Hydrating Cream provides a **soothing and deeply hydrating action** that supports tissue repair processes, **helping to reduce redness** and potential **skin lesions**.

Product description: *Jalosome® Hydrating Cream* is a medical device **designed to restore the hydrophilic properties** of the stratum corneum in cases of physiopathological skin alterations following radiotherapy treatment. Its specific formulation deeply nourishes the skin. The emulsion of its ingredients helps maintain hydration, while simultaneously preventing the formation of skin lesions by reducing dryness, redness, and fragility. It creates a moist environment that **promotes the natural wound-healing process**.

Intended use: the product is indicated for individuals who have completed a radiotherapy cycle and have irritated, dehydrated skin. *Jalosome® Hydrating Cream* has a soothing effect and supports the natural skin regeneration process while maintaining optimal hydration levels.

Areas of Use: Erythema - Dermatitis - Cutaneous Xerosis - Chronic Skin Dryness in General - Skin Redness.

Ingredients

Aloe barbadensis (leaf extract):

Possesses soothing and emollient properties for the skin. Its polyphenols ensure anti-inflammatory and wound-healing action.

Prunus Amygdalus Dulcis (sweet almond oil):

Extracted from the pressing of the tree's fruit, it is rich in vitamins A, E, D, and unsaturated fatty acids. It has emollient, nourishing, and hydrating properties.

Olea Europaea Fruit Oil (olive oil):

Estratto dalla spremitura del frutto dell'albero, è ricco di vitamina A, E, ed acidi grassi insaturi. Ha proprietà emollienti, nutrienti e idratanti.

Triticum Vulgare (wheat germ oil):

Its vitamin E (tocopherol) provides antioxidant and anti-radical properties, which are important in preventing damage to the skin barrier.

Panthenol:

A precursor of vitamin B5, naturally present in the skin. It has hydrating and nourishing properties. It promotes skin regeneration, improving elasticity and barrier function.

**SKIN LESIONS - SOOTHING - HYDRATING
RADIOTHERAPY AND CHEMOTHERAPY.**
